Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Information Disclosure Statement

1. The prior art documents submitted by applicant in the Information disclosure Statements filed on 2/18/05 have all been considered and made of record (noted attached copy of form PTO-1449).

It is noted that the German and French patents have been considered to the best of the ability of the examiner without benefit of translation.

Claims Rejection Under 35 USC - 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1, 4-30, 33-40 and 42 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by **Xiao** (6,601,953).

Xiao discloses shelter frame kit for spectacle frame which comprises an auxiliary lens assembly for use with a pair of spectacles having a pair of primary lenses (10), said assembly having a pair of auxiliary lenses (20) interconnected to one another by a bridge, a subframe (33 or 34) connected at one end to said auxiliary lens and having a magnetic member (22 or 23) at an opposite end for connection to a magnetic member on said spectacle and thereby locate said assembly on said spectacles, said subframe including a hinge (31 or 32) to permit movement of said assembly between a first

position in which said auxiliary lenses cover said primary lenses to a second position in which they do not cover said primary lenses (see figures 19-25 and the related disclosure).

Double Patenting Rejection

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-42 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-41 of U.S. Patent No.

Art Unit: 2873

6,820,976. Although the conflicting claims are not identical, they are not patentably distinct from each other because both patent and this application are disclosed eyeglass with flip-up auxiliary lens assembly having a subframe including a hinge to permit movement of the assembly between a first position in which the auxiliary lenses cover the primary lenses to a second position in which they do not cover the primary lenses.
